Bring imagination to live. Understand the clients' need, create a suitable solution for them, listen to the end users, and help fix their daily problem. I have been doing this over ten years now.

Summary of Qualifications:

During eleven years for software development, I worked on numbers of projects, including website development, multimedia creating, database programming, Java programming, software testing, and hardware testing. I have a programming background in Javascript, jQuery, Flex 3, ActionScript 3, Java, C, C++, VB, ASP, HTML, and SQL. Before my IBM employment, I worked at five different companies as a co-op student, and also worked during academic sessions as the web master for several departmental websites at the University of Massachusetts.

Experience and Accomplishments:

Aug., 2012 - Present Advanced Practice Strategies, Inc.

Senior UI/UX Designer, Interaction Developer Work as member of UI/UX team, create and design the best medical learning method for busy doctors and nurses continue education and certification. Create online interact teaching method, and online assessment. Also taking role of coordinator, close the gap between content team and engineer team, developed and delivered Gnosis, a SaaS eLearning platform for doctors and nurses throughout the US. Worked on all aspects of a .NET web stack including SQL Server, MVC3 and JavaScript. Create jQuery plug-in for widgets using thought out the entire Gnosis application, cross browser compatible design, IE7 to iPad.

July, 2008 - Aug., 2012 RBM Technologies Inc.

Adobe Flex Senior UI developer Convert The RBM FrontLine™ Web Suite into Android tablet compatible application using HTML5 technologies. Create Visual Merchandising Manager (VMM) mobile using Adobe AIR. Design and developed real time 3D floor plan designer with augmented reality technologies, Paperversion 3D, and SketcUp. Using haXe and AIR I created an online/offline app called Fixture Creator, which can generator simple fixture icon(s), and output file in swf, svg, and png formats.

Jan., 2008 - June, 2008 RBM Technologies Inc.

Adobe Flex Senior Consultant The RBM FrontLine™ Web Suite is a web base retail

merchandising process management tool, helping out with store design, fixture placement, and merchant's layout. As a contractor, I been working with back-end developer, design and developed next generation [planogram](#) designing tool, and fixture placement tool, using Adobe Flex 3 and Actionscript 3, both of them are one hundred percent data driven UI, fully translatable web base applications. Keep the customer in mind, both applications are designed with easy understanding visual interfaces, user error proof, data entry validation, better, more understandable error messages, and auto-convert, auto-correct old data into newer formatted data. They also have build in debug function to help back-end developer to debug within the application. Project is finished on time and within budget.

May 2006 – Jan.,2008 Centive Inc.

Sr. UI Software Engineer create web base technology solutions for automating compensation management, using latest web 2.0 applications, develop rich interface web application using **Flex** and **ActionScript** from Adobe (Macromedia).

<http://www.centive.com/services/compel>

- Use Flex 1.5 and 2.0 create re-useable **components**.
- Write UI controller in and data processing ActionScript 3.
- Migration Flex 1.5 to 2.0, ActionScript 2 to 3.
- Work with mid tier Java developer, connect EJB Weblogic to front end.
- Help with project plan and production maintenance.

June, 2001- 2006 IBM Inc.

Software Engineer, Services Professional in the e-business Integration, Enterprise Application Development Practice. The practice is responsible for providing project management, integration services, and e-business solutions to area businesses.

Web site focused projects:

- Served as a member of a creative team in building a new web section (About Us) for **American Express**, responsible for **HTML**, **ASP**, and **CSS** codes. http://home3.americanexpress.com/corp/pc/press_center.asp
- Participated in creating a demonstration website for **AllState** Insurance Company. Using **HTML**, **JSP**, and **Flash** to show client what IBM can create for them.
- Join a creative team to build a Flash presentation for **American Express**, responsible for both **Action Script** codes and **Flash** animation.
- Worked productively in a development team to build an intranet website from the ground up for **Aetna** Insurance Company, Responsible for **HTML** templates, **CSS**, and **JSP** codes.
- Successfully designed, developed and implemented the new **IBM W3 Bluepages** with new function and interface (IBM w3 Bluepages is an intranet for IBMer doing research on other IBMers, include contact information, projects, job experience and special interest), responsible for **HTML** templates, and **CSS** codes.

- Work as web developer in “full cycle” website design and creation for **Regulatory Data Corp.** to design and create their entire website. Using **HTML, JavaScript, CGI.** <http://www.regulatorydatacorp.com/>
- Join the development team in the website rename and upgrade of **Altria Group (Philip Morris).** Responsible for micro design documents, **HTML** templates, **ASP** transform controlling, and **CSS** codes for the new website. <http://www.altria.com/>

Multimedia focused projects:

- Join the production of a short introduction film for **American Express**, to help an IBM marketing effort. Digitized all film footage, edited movie clips, and create the interface layout. Software used includes: **Adobe Premiere, Adobe After Effects, and Adobe Photoshop.**
- Served as a team member in generating a 15-minute 3-D computer animation movie, designed as non-violent children’s entertainment (for age 4 and up.) Software used includes: **RayDream Studio, Infinite-D, Adobe Premiere, Adobe After Effects, and Adobe Photoshop.**

Software focused projects:

- Work as a back-end Java developer on **IBM ERS**(Expense Report Solution), working with individual clients, create specific functions for each client’s need. The back-end will control the application’s administrative functions, and passing data between **DB2/Oracle** and the front-end in a **J2EE** environment.
- Work as Java developer on IBM MSP(Multiple Service Platform) 300MM wafer FAB(Fabrication facility) FOUP(front opening unified pods)responsible for create, customize, installation and maintenance of the MSP application in the 300mm environment. MSP connect SiView and individual 300MM tools, create world first fully automated semiconductor manufacturing facility.
- Developed an MS-Access tool to organize test cases and test scripts for systems tests on **Fidelity** project. Using Microsoft **Access**, and **VB script.**
- Worked on the development a new internal labor-claiming system for IBM. Using Microsoft **Access**, and **VB script**, it can generate weekly labor hour report for management.

Sep., 2000-May, 2001 University of Massachusetts Amherst. Amherst, MA

Webmaster

- Webmaster for Department of Plant and Soil Sciences
- Webmaster for Office of Jewish Affairs
- Designing and coding Web-pages
- Designing Web-base images; i.e., image process, animated pictures, various banners, buttons and logos

June, 2000-Sep., 2000 Network Engines Inc. Canton, MA

Software Testing Engineer (Co-op)

- Developed automated testing software on Windows system (using VB)
- Designed and created Linux FTP testing process for hardware reliability test (using C and shell scripts)
- Testing NetworkEngines’ modified version of Webmin and Apache Web Server which resides on Viper LX

June, 1999-Sep.,1999 Microway Inc. Kingston, MA

Software Design Engineer (Co-op)

- Designed and created Microway's compiler driver 0.9 and 1.0 testing software on Linux platform (using C)
- Analyzed performance and reliability of Alpha 21264DP hardware and software (using SPEC95)

Sep., 1998-Jan., 1999 Excel Switching Co. Lucent Hyannis, MA

Hardware Testing Engineer (Co-op)

Software Design Engineer

- Designed Purge Information Collector (Database management system, using MS-Access)
- Designed DMT plans and test procedures (Design Maturity Test)
- Documented hardware test plan
- ARPP calculation (Automated Reliability Prediction Procedure calculation)
- Assisted in-house computer lab

June, 1998-Aug.,1998 UMass Amherst Career Network Amherst, MA

Web Master (Co-op)

- Designed and coded Campus Career Network's Web-page
- Designed Web-page graphics; i.e., image process, animated pictures, various banners, buttons and logos.
- Set up and maintained Campus Career Network's Web site

Education:

Sep., 1996-May, 2001 University of Massachusetts Amherst Amherst, MA

Computer science (class 2001)

(100% self-finance)

Computer Skills:

- Hardware: Alpha-based Unix workstation, Intel based PC, Macintosh, and Intel-based Unix workstation
- Operation System: Linux, Unix, AIX, MS-DOS, Windows, Mac OS X
- Programming: AS3, Javascript, Java , JSP, C, Pascal, Basic, HTML, Dbase, Assemble, and VB.
- Other Applications: IBM VisualAge for Java 4.0, Oracle 7.1-7.3.3 (on HPUX, UltraSparc, Sparc, Solaris, IBM Workstation, Digital Alpha, Alpha NT, Win3.1, Win95, WinNT), Adobe Illustrator8.0, Adobe PhotoShop5.0, MS-FrontPage98, RayDream Studio5.0, Infinite-D4.5, Direct8, Flash4, MS-VJ++ and MS-VB5.0, Webmin, Apache WebServer 1.3, ProFTPD Server, Majordomo, TestDirector 7.2, WinRunner 7.0

Credentials:

- B.S. in Computer Science from the University of Massachusetts Amherst.
- Certified as a Java 2 non-GUI programmer.
- Certified as a WebSphere Servlet programmer.
- Certified as a Mercator programmer.
- Certified as a TestDirector 7.2 developer
- Certified as a WinRunner 7.0 programmer.

Languages:

- Fluent in Mandarin and Cantonese Chinese.

Nationality:

- US citizen
